Muslim College of Education conducted skill development programme for B.Ed. first year student teachers from 18/07/2022 to 25/07/2022 at 10.00 a.m.

The skill development programme was organized as it determines the student teachers to get trained and well-groomed to carry out their duties effectively. It helps them to develop self-confidence, speech modulation and expressive abilities. They learn time management, improve body language, imbibe a positive attitude and improve communication skills, which are very important when taking up teaching as a profession.

Micro teaching is a highly individualized training device and an experiment in the field of teacher education which has been incorporated in the practice of teaching schedule. The students are providing immediate feedback in terms of peer group feedback, tape recorder, or CCTV. Micro teaching is a student teaching skill training technique and not a teaching technique or method. Student teachers are asked to practice one skill at a time. The class size was reduced to 5 to 10 pupils or students. The content was limited to a single concept. Micro teaching is micro in the sense that it scales down the complexities of real teaching. Micro teaching advocates the choice and practice of one skill at a time.
